

Bonnie's Recipe for No-Fail Compost

Ingredients: Nitrogen + Carbon + Water + Oxygen

One part Nitrogen

Fruit and vegetable scraps

Tea bags

Fresh prunings and trimmings

Green weeds (seedless)

Coffee grounds

Feathers and hair

Spent flowers

Grass clippings

Add:

Two or three parts Carbon

Dried leaves and grass

Shredded paper and cardboard

Wood chips, sawdust (untreated)

Pine needles (slow decomposition)

Dead dry plants and flowers (not diseased)

Straw

Coffee filters

Used paper towels and napkins

Layer in a pile preferably 3ft x 3ft or fill a homemade or commercial bin to 2 or 3 ft in depth.

Add:

Water, enough to dampen the layers. Don't over water but keep moist.

Add compost accelerator if you desire though it is unnecessary.

Compost happens without these, but, you can add:

Blood meal, commercial compost starter, chicken

and other vegetable-eating animal manures sparingly.

No dog or cat waste!

Oxygen, mix or turn often (at least once a week) to oxygenate.

Check temperature often. If not hot enough, (100 deg.+ is nice) it may be too dry or needs nitrogen. Add and and most importantly turn!

Let cook until rich and crumbly and sift if necessary to remove un-composted pieces. Enjoy!

WHAT CAN I COMPOST?

GREENS = NITROGEN

- Fruit & Vegetable scraps
- Coffee grounds
- Tea bags
